The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Dispositi	on of Claims					
5)□ 6)⊠ 7)□ 8)□	Claim(s) <u>1-6</u> is/are pending in the application. 4a) Of the above claim(s) is/are withdray Claim(s) is/are allowed. Claim(s) <u>1-6</u> is/are rejected. Claim(s) is/are objected to. Claim(s) are subject to restriction and/o on Papers					
9) The specification is objected to by the Examiner.						
10) The drawing(s) filed on <u>04 January 2005</u> is/are: a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority u	ınder 35 U.S.C. § 119					
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Status

Claims 1-6 are currently pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Diezmann et al. (US 6,044,046).

As per claim 1 and claim 4, Diezmann et al. (US 6,044,046) discloses an apparatus (Figure 3) provided with communication means (11, 51) for obtaining an electromagnetic coupling with an (first) antenna (11) on an information carrier (1), and provided with a carrier body (50) and a pressure body (65) between which said information carrier (1) can be clamped - see Figure 3, a bridge (60, 61) in which the pressure body can move freely, which bridge serves to support the pressure body (65), and a second antenna (11 and/or 51 associated with the pressure body) which is coupled to the communication means, characterized in that the bridge is at least partly free from metal axially opposite the second antenna (see Figure 3, wherein there is no material of bridge (60/61) between coil antennae associated with the pressure body (65) in

Art Unit: 2627

the axial direction -i.e., no part of (61) extends over (51 and/or not part of (60) extends over (11) in (65), in the axial direction of axis (70)).

As per claims 2 and 5, characterized in that the portion of the bridge (60/61) that is at least partly free from metal comprises at least one radial interruption. That is, since there is no material, there is an infinite number of radial interruptions, which is "more than one."

As per claims 3 and 6, characterized in that the portion of the bridge that is at least partly free from metal comprises a groove in radial direction (e.g., the space between (61 and (60) and/or the space formed by (60) on which pressure body (65) resides in - see Figure 3.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William J. Klimowicz whose telephone number is (571) 272-7577. The examiner can normally be reached on Monday-Thursday (6:30AM-5:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa Thi Nguyen can be reached on (571) 272-7579. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
